

90 YEARS
1935 - 2025

INKiESS®
THE BERLIN GENUINE

CASH POINT AND CASH LOGISTIC SOLUTIONS

Sustainability | Efficiency | Rationalisation | Precision | 100 % Made in Germany

THE INKiESS SYSTEM

Reading off instead of Counting

Balancing faster, easier and safer

Time is Money

Independent of how many coins are into the coin holders – coin assets can be read off the coin holder scales in matter of seconds

Absolute Counting Precision

as coins are sloping graded

Safety against Overturning

by sloping coin sections (pat.)

Inserting coins

Single coins or entire rolls will be put at the bottom or on the last coin resp.

Taking coins

by removing the last coin (or up to 5 coins at once).

Rolling and Checking coin rolls

INKiESS coin holders are featuring two innovative marks showing at what amount coins can be wrapped for rolls

① a line from the bottom ② and an arrow from the top.

90 Years Sustainability

INKiESS single coin holders: long lasting, saving resources, made of high-quality recycleble plastic, easy convertible in case of new coins or for different currencies. Permanent scales inscription (no abrasion). Components and spare parts long-term available.

INKiESS products are characterised by perfect function as well as high practical value combined with long life-time. Due to these attributes and the acceptance with nameable users INKiESS is the European system supplier with the widest range of counting cashboxes – still made in Germany.

A MODULAR SYSTEM:

The considerable INKiESS sales range – **Made in Germany** – is comparable to a large modular system and therefore extraordinary variable. Between basic models and foreign bank-note inserts to roll top cash boxes several components are always put to an ensemble according to requirements. By dint of special counting cash trays (s. p. 13) solutions for country-specific currencies are available. In case of currency change or coin modification cash boxes can easily be updated by change of coin inserts.

CASH - THE FACTS:

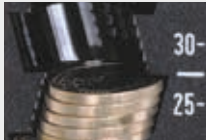

While payment preferences vary between Eurozone countries, cash continues to play a significant role in the broader European economy, making cash handling solutions relevant across the entire monetary union.

YOUR ADVANTAGE:

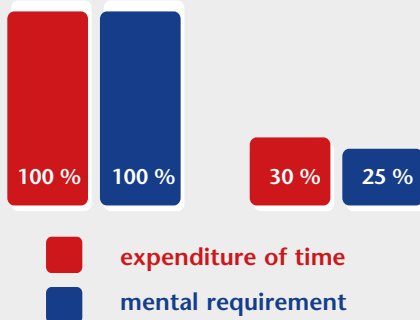

Collecting and Discounting
of cash
as a percentage

with coin bowls in
common cash
boxes or drawers

with INKiESS coin
holders and
cash trays

Time saving and mental relief are enormous to the user.

COiN COUNTiNG MADE EASY CLiCK AND DONE!

Count your coins in 5 seconds!

Get your coin counts in just 5 seconds - your EURO coins are counted instantly!

This is coin counting in 2 steps!

No counting, no weighing - just 2 taps and your results are right on your phone!

Simple. Intuitive. User-friendly!

Clean layout, zero distractions, no mental overload - fits seamlessly into your workflow.

The app that speaks for itself!

Intuitive, clear user guidance. Anyone can use the app without any training time.

Anywhere. Offline. Local intelligence!

Complete your cash register closing wherever it's needed: outdoors, at events, back office, etc. All without the internet!

Works with all Original INKiESS inserts!

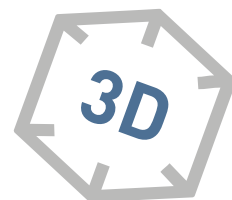

The INKiESS app will launch around mid-September!

INKiESS SUSTAINABILITY in 3D

What once seemed like sci-fi is now our production reality. We are creating products using a range of cutting-edge 3D printing methods. Our innovation journey began 90 years ago with pressed Bakelite coin holders. From there, we embraced vacuum forming and polyurethane foaming. The 80ths brought two colour injection molding, and in 2021, we took our next big leap into 3D printing.

Today, we operate a fleet of professional printers for different jobs. SLS is our go-to for tough, industrial parts, while FDM brings our multi-coloured products to life. We're already putting this technology to work. We have already upgraded key product lines to 3D innovation, including: **GERO coin counters, Roll Top cash boxes, Custom coin inserts, Sort cash registers and the new EM 2024 11€ collector coin cases**

Sustainability is key. Just like all INKiESS products, our 3D-printed parts are fully recyclable. We are building a better future, one layer at a time.

8 PL/D

For models **8 PL** and **8 PL-G** a covering lid is available. The lid protects the cash tray contents from customers view and makes it possible to stack the cash trays in a safe.

Handle of 8 PL-G
(G = handle)

INSERTS FOR CASH DRAWERS

Time is money as is well-known, but sometimes money is time. When the last customers have left the shop the employees are supposed to count the coins in the cash drawers. This may last agonising long – unless the drawers are equipped with INKiESS counting inserts.

Counting inserts are offering a considerable benefit compared to common coin tills.

Clearness and Security: time-consuming coin counting will be omitted – reckoning within less than 2 minutes. Besides **Time Saving** it implies mental relief for the user and thereby error prevention. (Laborious permuting of tills for weighing is needless.)

Very Easy Handling: Single coins or the content of entire coin rolls slide automatically into the coin sections (exactly 5 coins each). Inserting coins will be all but “automatic” within short term. As coins are staggered slanting there is more **Counting Security**. False and foreign coins will be recognised immediately. Returning change is even easier than arranging the coins into the sections taking one to five coins at once. A rolling mark ① indicates at what amount coins can easily be wrapped up into rolls. Moreover, with the help of the rolling mark one can check whether the content of newly opened coin rolls is correct.

What does fit where? – At a glance

INKIESS is offering counting inserts for the leading POS manufacturers. The detailed scheme please find on our website:
<https://inkiess.com/insert-for-cash-drawers/>

EUROKORD® SORT CASH BOXES

The sort cash boxes are representing a special group among the EUROKORD boxes. In exchange offices e. g. in airports they can help solving the problem to store larger quantities of foreign money. The exchange business will be managed efficiently and safely with a EUROKORD model. The arrangement of the sort cash boxes will be build of coin bowl inserts and note compartments for sorts like in a modular system (pages 12 and 13).

Banknote compartments **B 5 A** and **B 7 A** with 5 or 7 compartments of different widths.

B 4 A

B 7 A

GB 52

GB 52 for a larger quantity of banknote wads.

MONEY HANDLING DEVICES

Money handling at cash desks – especially with respect to coins – is often a time-consuming and laborious task. There are considerable possibilities to rationalise work if „correct“ devices are utilised. The INKiESS product range offers a number of models that facilitate cash handling. Transport, sorting, rolling, checking, storing – no problem with INKiESS.

MONEY HANDLING DEVICES

MR 8

The coin roller **MR 8** facilitates the making of coin rolls. On one side there is a supporting pin with marks showing the margin width of paper, the sloping roll-bars ascending to the other side prevent coins from falling over.

RE 6

Roll insert **RE 6** with 6 compartments for ready-to-hand storage of coin rolls in drawers of cash desks. Due to the sloping design, the rolls (dropping to the front) can always be taken out easily.

GERO

INKiESS GERO for counting and ready-to-hand storage of coin rolls. Consists of 2 parts, 1 part for 2 € to 20 C and 1 part for 10 C to 1 C.

The **INKiESS GERO** is now also available as a customised plug-in system. All EURO coin denominations from 1 C to 2 € can be freely combined.

Roll storage containers

Roll storage containers for transporting and storing coin rolls at the cash desk and in a safe. Different sizes and compartments for each of the 8 EURO coin denominations. Thanks to the strong surrounding edge, same sizes can be stacked. Extremely resilient material.

GERO individual modules for customised combination.

STORING AND TRANSPORTATION

MONEY HANDLING DEVICES

2 x Z 2

Money tray **Z 2** with corrugated inside bottom to facilitate the removal of notes and coins. Money trays are designed to be stacked vertically.

Coin tubes / SIGHTBOX
(non-counting)

For storing euro coins. For exact specifications, always count before filling, as differences in quantity due to coin wear. With sealing caps. Available from 2 € to 10 C (approx. 2 rolls each).

TS 30 PLA

Money transport tray **TS 30 PLA** speeds up preliminary sorting and distribution. When empty they can be stacked.

SSM 30

Dirt sieve **SSM 30 PLA** for filtering dirt particles for trouble-free operation of coin counting machines, stackable.

BB 30/10

Note strap container **BB 30/10** for storage of note straps in vertical or horizontal position, with 10 compartments.

CARD STORAGE

KB 3

Card container **KB 3** is intended for well-organised and distinct storage of cheque, credit or customer cards. They feature 2 individually insertable partition walls. Additional partition walls are available on request as sets of 5 pieces.

KB 32 PLA/VS

Card container **KB 3** in **EUROKORD** housing. 3 card containers can be accommodated in the lockable housing. Housing made of recyclable PLA (polylactide) (description see p. 3). Security lock with 2 keys.

DOCUMENT PROCESSING

The paperless office in economy and administration is generally still a pipe dream – the paper flow has rather been intensified. Therefore INKiESS is offering the well-thought-out **Form** and **Voucher System**.

DOCUMENT PROCESSING

The voucher compartments are used e. g. at reception desks of hotels and medical practice as well as in banks, post and railway administrations, agencies etc.

BF-System light grey

Conceived as modular system in formats DIN A4, A5 and A6 a lot of different combinations are possible. Colours: light grey and black, model **BF 2** only in light grey available.

BF 1

BF 2

BF 7

BF 8

LEAFLET STAND FF 4-2

FF 4-2

On all types of desks as well as counters, forms, leaflets and brochures can be made available for customers with the help of the form compartment **FF 4-2**. Colour: light grey

The multifunctional container **MZB 7** is a universal special edition with 7 compartments for different form and voucher sizes. Label area on the front side. Nonslip base. Colour: light grey

GETTING THINGS SOLVED

90 years ago the foundation stone had been laid for a production of coin holders finally counting precisely – first time using plastic material for the production. More and more the products became a programme.

Within 9 decades this has been originating the modular system of INKiESS coin counting cash trays and special equipment for cash logistics – solutions for POS and back office.

INKiESS products are characterised by perfect function as well as high practical value combined with long life-time. Due to these attributes and the acceptance with nameable users INKiESS is the European system supplier with the widest range of counting cashboxes – still made in Germany.

RELIEVE CASH HANDLING – WITH INKiESS

in back office

Examples for use of INKiESS products in electronic devices

WAB | WAB
SICHERHEITS
SYSTEME

Cash logistics is expensive and in certain fields purchasing electronical devices is not worthwhile, always depending on the dimension of the particular cash volume. On the other hand products to complete electronical hardware are required. In such cases counting cash trays and further special products will be applied. Specifically with small volumes of money the INKiESS range offers variable solutions for counting, assorting and storing coins and banknotes.
